➜ San Francisco State University (SFSU) (Exchange Student)
◆ Bach of Computer Science (08/2014 - 06/2015)

#Who am I?

I am tech geek born in Sousa, PB, Brazil, fresh out of college currently enhancing my skills as developer and looking forward to work in a company where I could grow professionally and personally. During my time in college, I've had the opportunity of working with different areas such as: data analysis, distributed systems and web development. The last one is currently my expertise and where I'm focusing most while I'm studying. When I'm not coding I like to spend my time: tasting beers, gardening, dancing and practicing jiu jitsu(to fulfill the brazilian part of me, since I'm not a good soccer player).

#Work Experience

Software Practices Laboratory (SPLab) - VICERI

Title: Junior Developer
From: 2016 - 03/2018
